Professional Summary

Aspiring Full-Stack Developer with hands-on experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, and responsive frontend development. Strong understanding of backend systems, API integration, database management, and secure application development.

Education

A.P. Shah Institute of Technology, Thane Expected 2027
Bachelor of Engineering (B.E.) in Information Technology
Relevant Coursework: Data Structures, Operating Systems, DBMS, Computer Networks, Machine Learning, Web Development

Technical Skills

Languages: Java, Python, C, C++, JavaScript, HTML, CSS, SQL
Frameworks/Tools: Django, Git, VS Code, Linux (Kali), Wireshark
Core Concepts: Object-Oriented Programming (OOP), Data Structures, DBMS
Cybersecurity: Packet Analysis, DVWA Testing, Network Traffic Analysis, Attack Detection
Data Science/ML: Pandas, Scikit-Learn, Random Forest, LSTM

Projects

1. **Multi-Layer Cyber Attack Detection System (SIH 2025)** Sep 2025 – Dec 2025
   Python, Wireshark, Kibana, Grafana
   - Designed a multi-layer cybersecurity pipeline using DVWA for real-world attack simulation.
   - Implemented layered detection using Regex filtering, ML classification, and rule-based logic.
   - Processed network traffic (PCAP) sequentially to detect attacks like SQL Injection and Brute Force.
   - Developed Streamlit dashboard and integrated Kibana/Grafana for visualization of attack patterns.

2. **Stock Market Prediction System** Jan 2025 – Apr 2025
   Python, Pandas, LSTM, Scikit-Learn, Matplotlib
   - Built a predictive model using Random Forest to forecast stock trends.
   - Performed data preprocessing, feature engineering, and model evaluation.
   - Improved prediction accuracy using regression techniques on historical datasets.

3. **Streamline Task Management System (Full-Stack Platform)** Jul 2025 – Oct 2025
   React, Node.js, Express, MongoDB
   - Built a role-based project management system for tasks, teams, and reporting.
   - Implemented JWT auth, Argon2id hashing, and 2FA with audit logging.
   - Designed REST APIs for task assignment, approvals, and access control.
   - Developed dashboards and integrated real-time encrypted team communication.

Certifications & Achievements

- SIH 2025 Grand Finalist
- Winner – College Coding Competition (Stock Prediction)
- Participated in 5+ hackathons
- Ranked 14th among 300+ teams in competitive CTF challenges.

Additional Experience

- Built responsive and user-friendly web interfaces with reusable UI components.
- Integrated MongoDB databases with backend services for efficient data handling.
- Familiar with deployment workflows, debugging, and performance optimization in web applications.
