MAHESH MARATHE

DATA ANALYST INTERN | PYTHON • SQL • MACHINE LEARNING • DATA STRUCTURES

Thane, Maharashtra, India | +91 8767937414 | mahimarathe2005@gmail.com | github.com/MaheshMarathe005

PROFILE

Fourth-year engineering student targeting data analytics roles, with a Python-first approach to AI/ML and a strong foundation in DSA using Java. Hands-on work includes SQL/database-backed applications, data preprocessing and model evaluation, dashboards/visualization, REST APIs, and ML decision-support systems. Interested in using data to identify trends, build analytical solutions, and communicate actionable insights.

TECHNICAL SKILLS

Programming: Python (AI/ML, data analysis), Java (Data Structures & Algorithms), JavaScript/TypeScript, SQL
Data / Analytics: Pandas, NumPy, SciPy, data preprocessing, feature engineering, model evaluation, Matplotlib/Recharts, SQL querying
Machine Learning: Scikit-learn, XGBoost, SHAP, regression/classification, explainability
BI / Visualization: Dashboard development with Recharts; data visualization and reporting workflows
Databases / Backend: PostgreSQL, PostGIS, MongoDB, FastAPI, Django, REST APIs
Tools / Engineering: Git, GitHub, Docker Compose, Vite, Node.js, Express, JWT/OAuth

SELECTED PROJECTS

Geospatial AI Decision-Support Platform | *Python, FastAPI, PostgreSQL/PostGIS, XGBoost, SHAP, GeoPandas, MapLibre*
- Designed an end-to-end data and ML workflow combining geospatial datasets, preprocessing, ML scoring/forecasting, explainability, visualization, and decision-support outputs.
- Worked with XGBoost + SHAP for model scoring/explainability and GeoPandas/PostGIS/GeoJSON for spatial data handling; explored OR-Tools and AHP/TOPSIS for optimization and multi-criteria analysis.
- Structured the system as modular Python services with Docker-based deployment and reporting components.

Streamline Task Management Platform | *React, Node.js, Express, MongoDB, SQL concepts, Recharts*
- Built a role-based project/task management application with project membership, task tracking, reporting dashboards, and REST APIs.
- Implemented dashboard statistics and reporting endpoints, validation, protected routes, JWT authentication, Google OAuth scaffolding, and Argon2id password hashing.
- Used Recharts to turn application data into dashboard visualizations for reporting and monitoring.

Django Log Viewer | *Python, Django, HTML*
- Developed a Python/Django application for web-based log inspection, strengthening backend development and structured data handling skills.

EDUCATION

A. P. Shah Institute Of Technology, Thane | B.Tech / B.E. in Engineering | Expected 2027
Relevant coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, OOP, Computer Networks, Operating Systems.

CORE STRENGTHS

Logical reasoning • Structured problem solving • Analytical thinking • Data-driven decision making • Detail orientation • Team collaboration • Fast learning • Task ownership
